

*Built to Sustain.*

## **Reach a new level with the Raven Air Blast Sprayer**

### **Application Kit**

Specialty farmers can take control of their air sprayer applications with Raven's versatile technology stack. With Raven technology on air blast sprayers, high-value crop farmers cover 20% more acres per day and save 10% in crop protection input costs. By outfitting Raven tech onto an air sprayer, you can be more efficient, sustainable, and profitable in orchard and vineyard applications.

# RAVEN

**Coastal Pass**  
Precision Ag Solutions & Services

**Implement Base Kit** includes an RCM-Universal node, with Level 0 unlock and Raven control valves.

### **Tractor Control Options:**

- **CR7** offers premium in-cab experience for producers who repeatedly farm the same path. This lightweight field computer delivers accurate, complex path planning—even on irregular-shaped rows and uneven terrain. CR7 records and retains data, including what was sprayed and where. Plus, this plug-and-play system easily moves between machines for maximum convenience and productivity. CR7 is a 7" touch screen.

- **VIPER 4+** is the go-to in-cab field computer providing the ultimate data management experience. Commonly used for seeding, spraying and spreading applications, Viper 4+ connects producers to the ecosystem of analytics for increased operational efficiencies. The 12.1-inch touchscreen makes pre-planning and application easy and intuitive. It provides complete accuracy for the dispatcher—ensuring the job information is entered correctly, the machine is in the right field and the correct prescriptions are applied.

### **Connectivity**

- **Field Hub 2.1** modem brings reliable and fast 4G LTE to your cab no matter where you are in the field. The reliable in-cab modem links your operator, managers and Slingshot®/Coastal PASS support to one another on one centralized network in real time. Effortlessly enjoy full web-based capabilities on your field computer and other mobile devices with reliable high-speed connectivity.

Precision Ag Solutions & Services

- **AgSync Dispatch Pro**

- **Unmatched scheduling platform:** We know having to manage multiple people, and pieces of equipment across many locations is difficult. Which is why Dispatch Pro was created specifically for you. To lessen or eliminate many of those burdens.

- Work Order Management
- Scheduling
- Asset/Application Monitoring
- Reporting and Analytics
- Mobile Apps

■ **Dispatch Pro Advantage**

- View in-route, active and idle equipment status
- Sort orders for best application via interactive map
- Easily remove or reassign work from equipment through a drag and drop interface
- Track work on map
- Dispatch across locations
- Know when assets are not working, reassign to where needed
- Work syncs immediately to Viper 4+ or the Field Ops app
